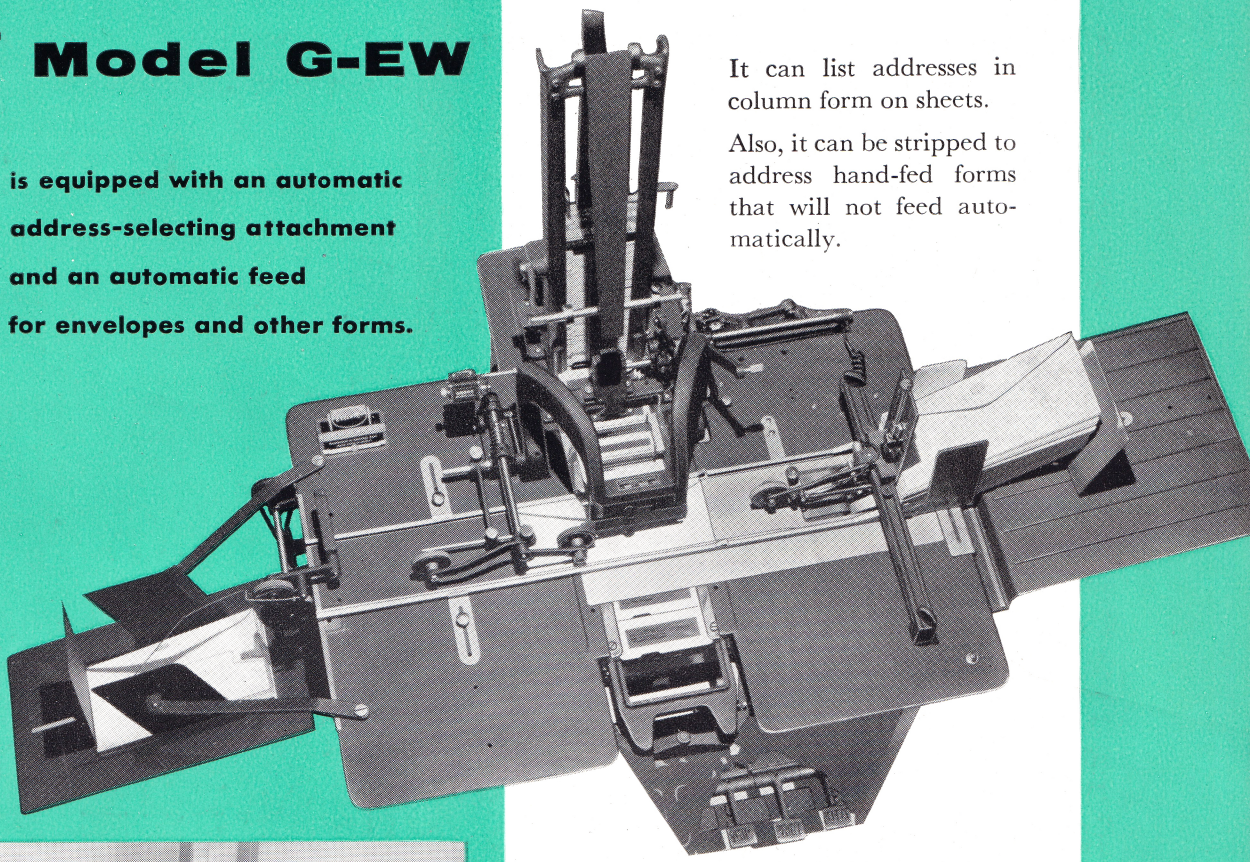
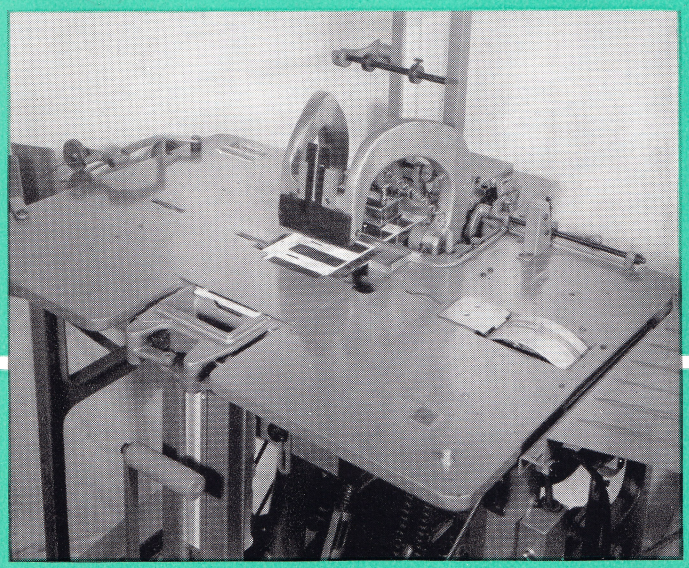
Elliott Model G-EW

is equipped with an automatic address-selecting attachment and an automatic feed for envelopes and other forms.

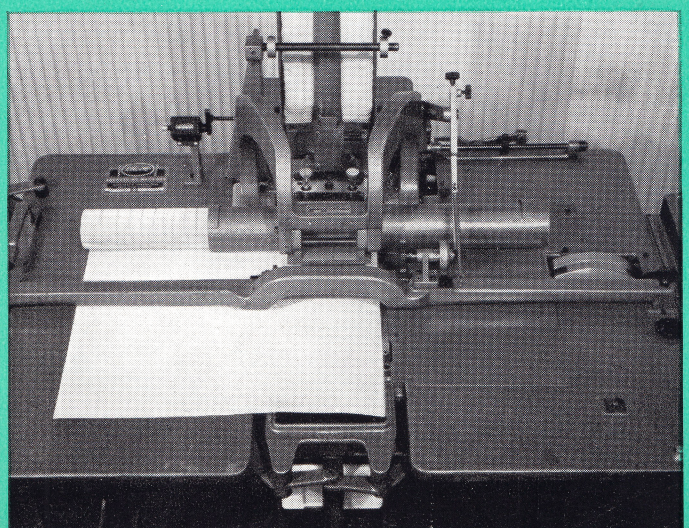


It can list addresses in column form on sheets.

Also, it can be stripped to address hand-fed forms that will not feed automatically.



Here the Model G-EW has been stripped to permit the hand feeding of forms which it cannot automatically feed.

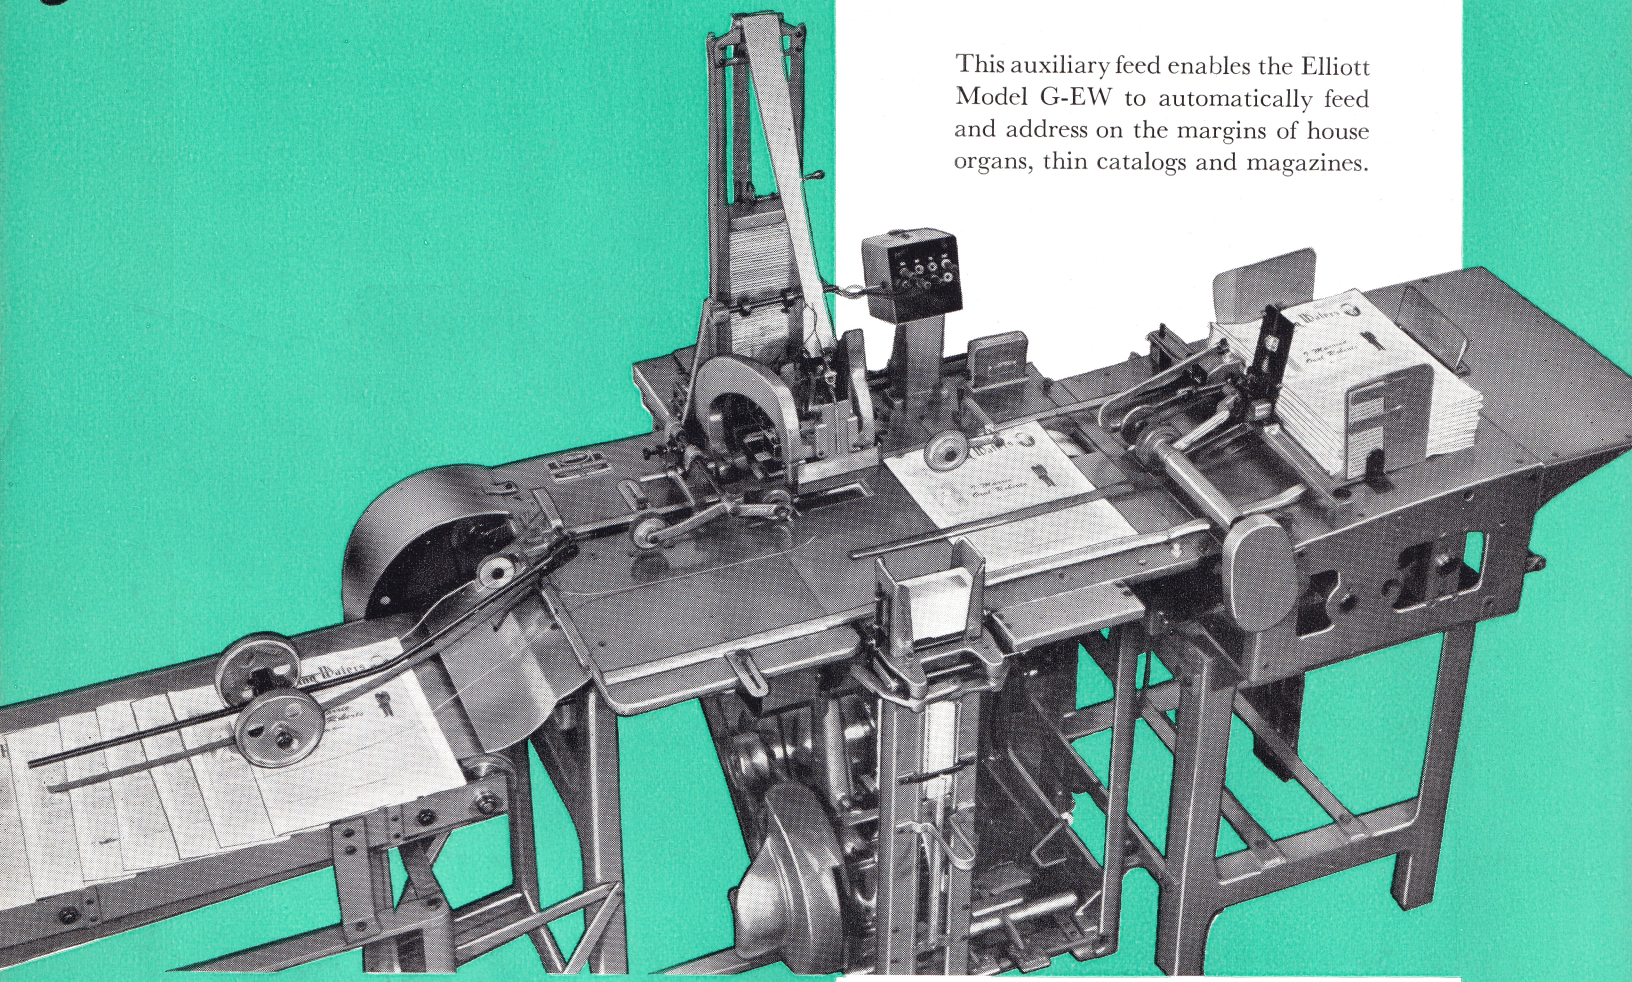


Here the Model G-EW is listing names or addresses on a Pay Roll or Tax Roll Sheet.

Printed in U.S.A. 5-54D

Elliott Model G-EW Auxiliary Feed

This auxiliary feed enables the Elliott Model G-EW to automatically feed and address on the margins of house organs, thin catalogs and magazines.



Elliott Model G-EW

automatically feeds
and multiple addresses
pre-printed public utility bills.

This machine was redesigned in 1953 to do all the addressing work of a municipality. It will address the water bills, refuse collection bills, and the tax bills. It will print the owners' names with a description of their real estate on the tax roll sheets. All these bills are addressed in triplicate or quadruplicate without the use of carbon paper.

Any municipality can save a great deal of money and labor by using this Model G-EW addressing machine.
